# 00 Intro

## Introduction

AmWorld specialises in delivering documents, packages and freight items for demanding customers.

Anytime, anywhere. So long as you can access the internet, you can set the wheels in motion.

You get the best of both worlds... people you can talk to who know their stuff reassuringly well and don't let you down, plus reliable intuitive technology that safeguards your precious cargo and makes life a bit easier along the way.

We've spent over 25 years moving things around. And we pride ourselves on reliability, efficiency and aptitude. We're focused and we know our stuff, offering a range of tailored logistics and merchandising services.

**01 Collect**

## Collecting Stuff

- Same day
- Next day
- To most major cities by nine or noon
- In evenings
- At weekends

Like choosing any of our services, you get to take your pick.

If you're after more than a collection and delivery service, we offer storage, collation, fulfilment and despatch from our warehouse inside the M25.

Where we deliver, we can collect. You get the same response, control and value as for outbound movements. We sort out the paperwork, get the necessary clearances and deliver right to your door.

From the moment of booking, your consignment becomes part of our real-time, web-based, electronic tracking and reporting system which you define and control.

Our user-defined, state-of-the-art software gives you a fully automated, interactive stock control interface designed the way you need it, handling distribution from any internet connection, day and night.

02 Store

## Storing Stuff

On arrival, goods in are verified, barcoded and referenced electronically so you always have access to inventories, online stock reports and shipment searches, which prove invaluable to many clients.

Once your items are in stock, we use pictures, descriptions and prices as simple ways of identifying stock.

We destroy and dispose of redundant stock and provide certified paperwork of any transactions.

Modern warehousing (and offices) near Heathrow provides clean, dry, secure storage. The warehouses have 24 hour on site security + CCTV + link to police + swipe card only access. There are padlocked cages for extra security and all vehicles are fitted with slam locks.

## Storing Information

Not only can you keep constant track of your package's whereabouts in real-time as it takes its journey. Even when the parcel's been delivered and forgotten, through the online booking interface, you have any data about it at your fingertips.

The software is easy to use, anywhere and anytime.

Customisable, exportable reports by:

- Price
- Department
- Campaign
- Destination
- Authorisation

03 Pick

## Picking Stuff

Picking and packing relies on accuracy and attention to detail.  
We promise stacks of both.

Total automation; total control. The most customer-centric logistics technology available is customised for you and controlled by you. It lets you cost shipments, book online, manage addresses, control stock, recover archives, run reports, and handle mailings. Plus we send you a confirmation email of all transactions.

We collect and collate goods for a one-off project or hold stock for you to call off for dispatch as and when, or according to your planned campaign schedule.

04 Pack

## Packing Stuff

We can wrap in cotton wool, pop into boxes, tuck into tubes, handle with kid gloves or environmental wellies, load onto pallets, band and shrink wrap, fit foam around, craft crates for, or hand-pack onsite.

Or pander to any other handling you deem necessary for your treasure!

Once it's all wrapped up and ready for the off, finding the best way of moving a package can be both tricky and extensive. All we need to know from you is the level of care and attention, the deadline and the destination.

We source the most appropriate carrier and service.

## Jumping Through Hoops

Independence means we can pass on the best discounts and deals in very competitive prices, accessing any and every carrier globally, giving us the flexibility to tailor to our clients' needs. The answer is never 'no' and we can achieve the most demanding deadlines.

We save you and your package time and hassle through the whole process with the highest level of customer service.

We handle all the paperwork, oversee clearance procedures, sort out charges for weight/volume and avoid the delays that result from inaccuracy.

**05 Move**

## Moving Stuff

**Courier.** Security and peace of mind when a parcel deserves not to change hands.

**International.** Road, air and sea freight for large consignments, anywhere in the world, in any timeframe.

**Emergency.** 24/7 door-to-door service to many countries and territories.

**Cotton wool.** A high security service for high value commodities; both precious and private.

Most major cities in the world are reached within one to three days. Of course, if the only way to reach your remote film location is via camel then it's going to take a little longer than negotiating even the worst of Cairo's roads.

On a more serious note... en route, every shipment is automatically insured for £100. Additional cover is easily arranged to suit the commodity and destination.

Circles we move in. Media, gaming, entertainment, tourism and finance. Anyone, in fact, who cannot contemplate their consignment failing to arrive on time.

**06 Deliver**

## Delivering A Service

It's not just about delivering stuff; we deliver service too. 24/7 from our London HQ, from our own dedicated team. There's no call centre to deal with; just friendly staff who are quick to respond from UK delivery schedules to the most awkward international customs requirements.

The extra level of care isn't confined to the quirkiest consignments or complicated international campaigns. For any customer we can step up with valuable services to give you what you need, from producing pre-printed consignment notes for repeat campaigns to tweaking the quotation system to fit your way of doing things.

**07 More**

## Just Ask Us

We've collected Seal's leather trousers from LA and delivered them in time for his London gig, we've hand-delivered Chesapeake Blue Crabs from Washington for a UK film shoot, and even escorted a tardy housemartin to Faro that had missed the first leg of its migration. So, when we say "just ask us", we mean it.

If you need to know anything else, please do get in touch. We may have handled some weird and wonderful shipments in our time, but on a daily basis we move around 200 packages, for some of the world's biggest brands.

You get the best of both worlds... people you can talk to who know their stuff and don't let you down, plus reliable intuitive technology that safeguards your precious cargo and makes life a bit easier along the way.

## Just Ask Them

**Ubisoft Limited.** “They have a ‘can do’ attitude. The booking system is tailored to our needs and saves considerable time. I can confidently recommend AmWorld”.

**National Geographic Channel.** “AmWorld’s strength lies in their capacity to be flexible and attend to the smallest detail. They are friendly and approachable, but provide an extremely professional service”.

**Sony Computer Entertainment.** “AmWorld are awarded our main contract for distributing all outgoing national and international courier parcels. Their reliability is worth every penny”.
